HEAVY DUTY TILES

Royal Ceramica is the first factory in Africa and the Middle East to manufacture heavy duty tiles and was among the first three factories in the world to produce a tile with such technical characteristics.

Our Heavy Duty tiles are extremely wear-resistant and absorbing less water than other tiles, making them an excellent choice for high-traffic areas, especially those regularly exposed to moisture, such as hospitals, schools, malls, and factories.

NEW GENERATION PORCELAIN TILE

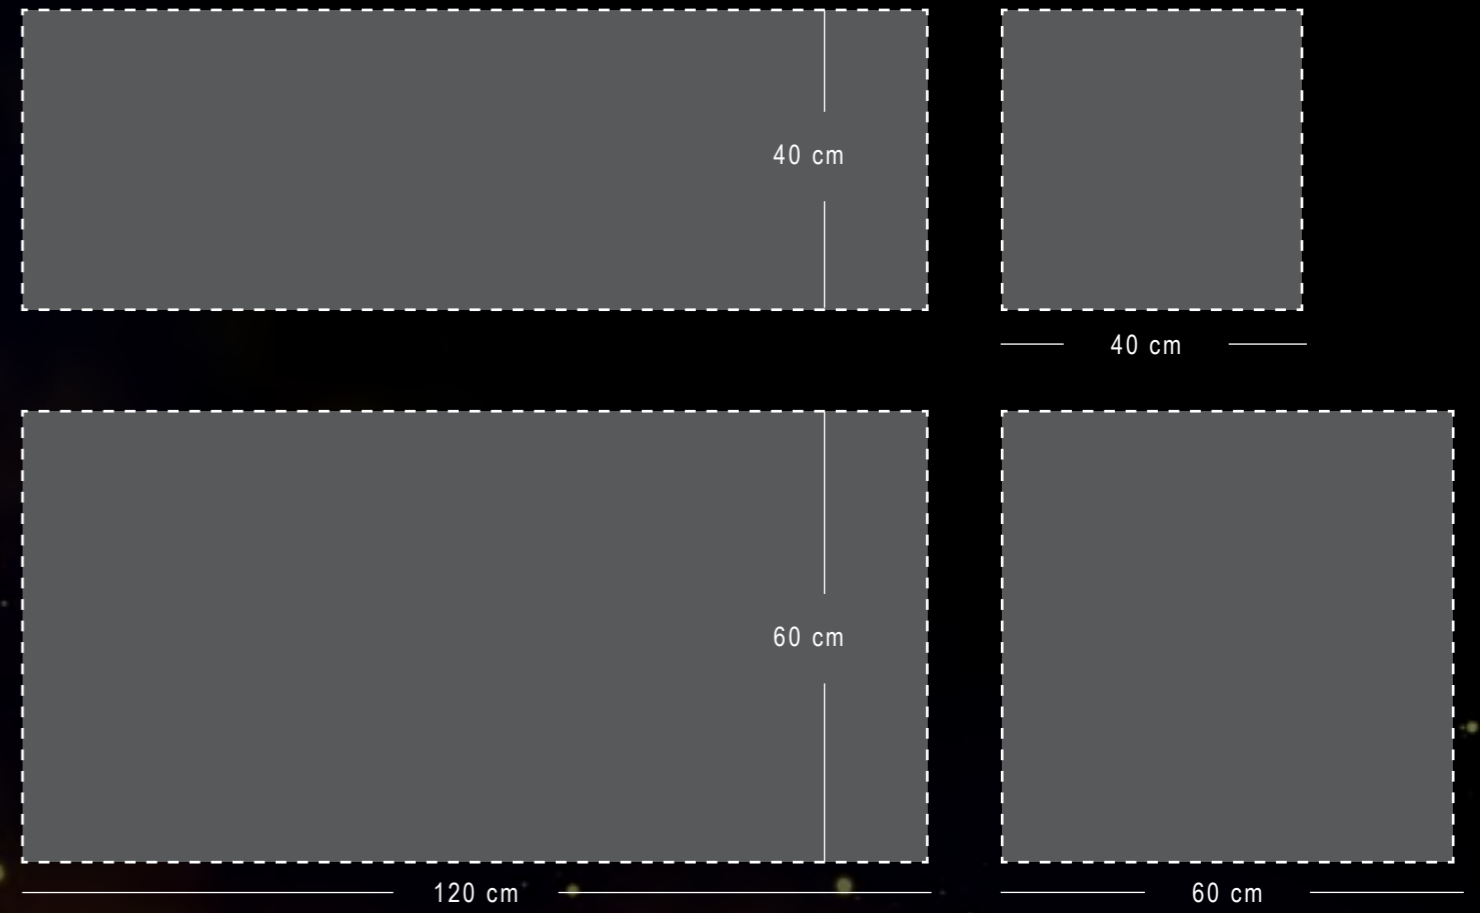

Porcelain tiles have become all the rage with regards to home interiors, and it is no wonder why – they are durable, hard-wearing and offer a beautifully sleek and upmarket aesthetic.

Semi polished porcelain tiles: The glaze on these tiles has only been given a partial polish, giving them a polished appearance that follows the texture of the pattern that has been applied during the glazing process. The biggest benefit of this technology is that you end up with a more effective non-slip texture that can be carried through from indoor to outdoor applications in the home.
